Now Next Future: technology serving design

Join your colleagues November 2-3, 2012, and explore how enhancements in design thinking have been made possible through technological innovation. Technologies are evolving at unprecedented rates. Learn how to leverage further design and how to sort through the plethora of new resources and choose the best for your company and your clients. Click here for more information and to register.

How to Convert Key Design Issues into Research Questions

The Tall Office Building: Critical Events Since 9/11
Architectural designers are prolific generators of research topics. The very essence of the design process is to identify questions and pose answers. This process, emphasized by William Peña and Steve... Read More

The American architecture critic John King surely echoed the sentiments of many some years ago when he wrote, “Everything’s different after 9/11” (1). In one sense, everything... Read More

Report Leads to Call for New School Facility Bonds

The Center for Cities & Schools at the University of California, Berkeley, recently released a report on school facilities commissioned by the California Department of Education. Read more

New Online Accessibility Courses
